## Profile

- Anderson is a mobile app developer with experience developing and launching 5 successful cross-platform apps using React Native, achieving a user rating of 4.5 or higher
- Recently, he played a key role in securing \$3M in funding for an AI-related mobile app.
- He utilizes the latest app development technology to optimize user experience and effectively achieves project goals through teamwork and problem-solving skills in an agile environment.

Curious about what he could bring to the table? Just say Hi!

## Employment History

### Senior React Native & Full stack developer of [Inspy AI](#)

JUN 2023 — SEP 2024

- As a Founding Engineer, I determined and implemented a robust technology stack tailored to our business needs, leading the charge in designing and developing initial products from the ground up.
- My role spanned multiple disciplines, including mobile, web, and backend development, in a fast-paced startup environment. I adeptly wore many hats, ensuring a tight feedback loop for product iterations from initial launch to beta testing.

### Senior React Native developer of [Dragon Army](#)

MAR 2023 — MAR 2024

- Engineering cutting-edge medical insurance applications utilizing the latest React Native framework and TypeScript, integrating diverse third-party services for enhanced functionality.
- Excelling in ideation and development processes within cross-functional teams, driving innovation and advanced technical solutions.

### Senior React Native developer of [Kayan Health](#)

NOV 2022 — FEB 2023

- Designed, developed, and maintained cross-platform mobile applications using React Native and Redux.
- Worked with a team of developers, designers, and product managers to deliver high-quality solutions within tight deadlines.
- Implemented RESTful APIs for data retrieval and storage.

### Senior React Native & Full stack developer of [Uneksija](#)

APR 2021 — FEB 2023

- Built and deployed React Native applications for both iOS and Android platforms.
- Experience writing data APIs and multi-server applications to meet product needs using Laravel.
- Save, analytics, and predict babies' activity using python scripts.
- Integrated Jenkins to git where the build triggers automatically when we push a pull request for CI/CD.

## Education

### Bachelor's Degree in Computer Engineering, Nagoya University Of Japan

APR 2012 — MAR 2015
